## OVERVIEW

Having established in 2007, **Phu My Engineering & Construction Joint Stock Company (PMEC)** is very proud as the first Vietnam professional company in applying the post tensioning design and construction for building and industrial projects.

We are always learning the most updated knowledge of the industry in technical standards, material, construction methodology as well as upgrading the service quality to maintain our reputation as a reliable & quality company which widely acknowledged by our esteemed clients so far. With more than 300 successfully completed projects nationwide and an experiences, well trained manpower, PMEC have secured the position in the construction market.

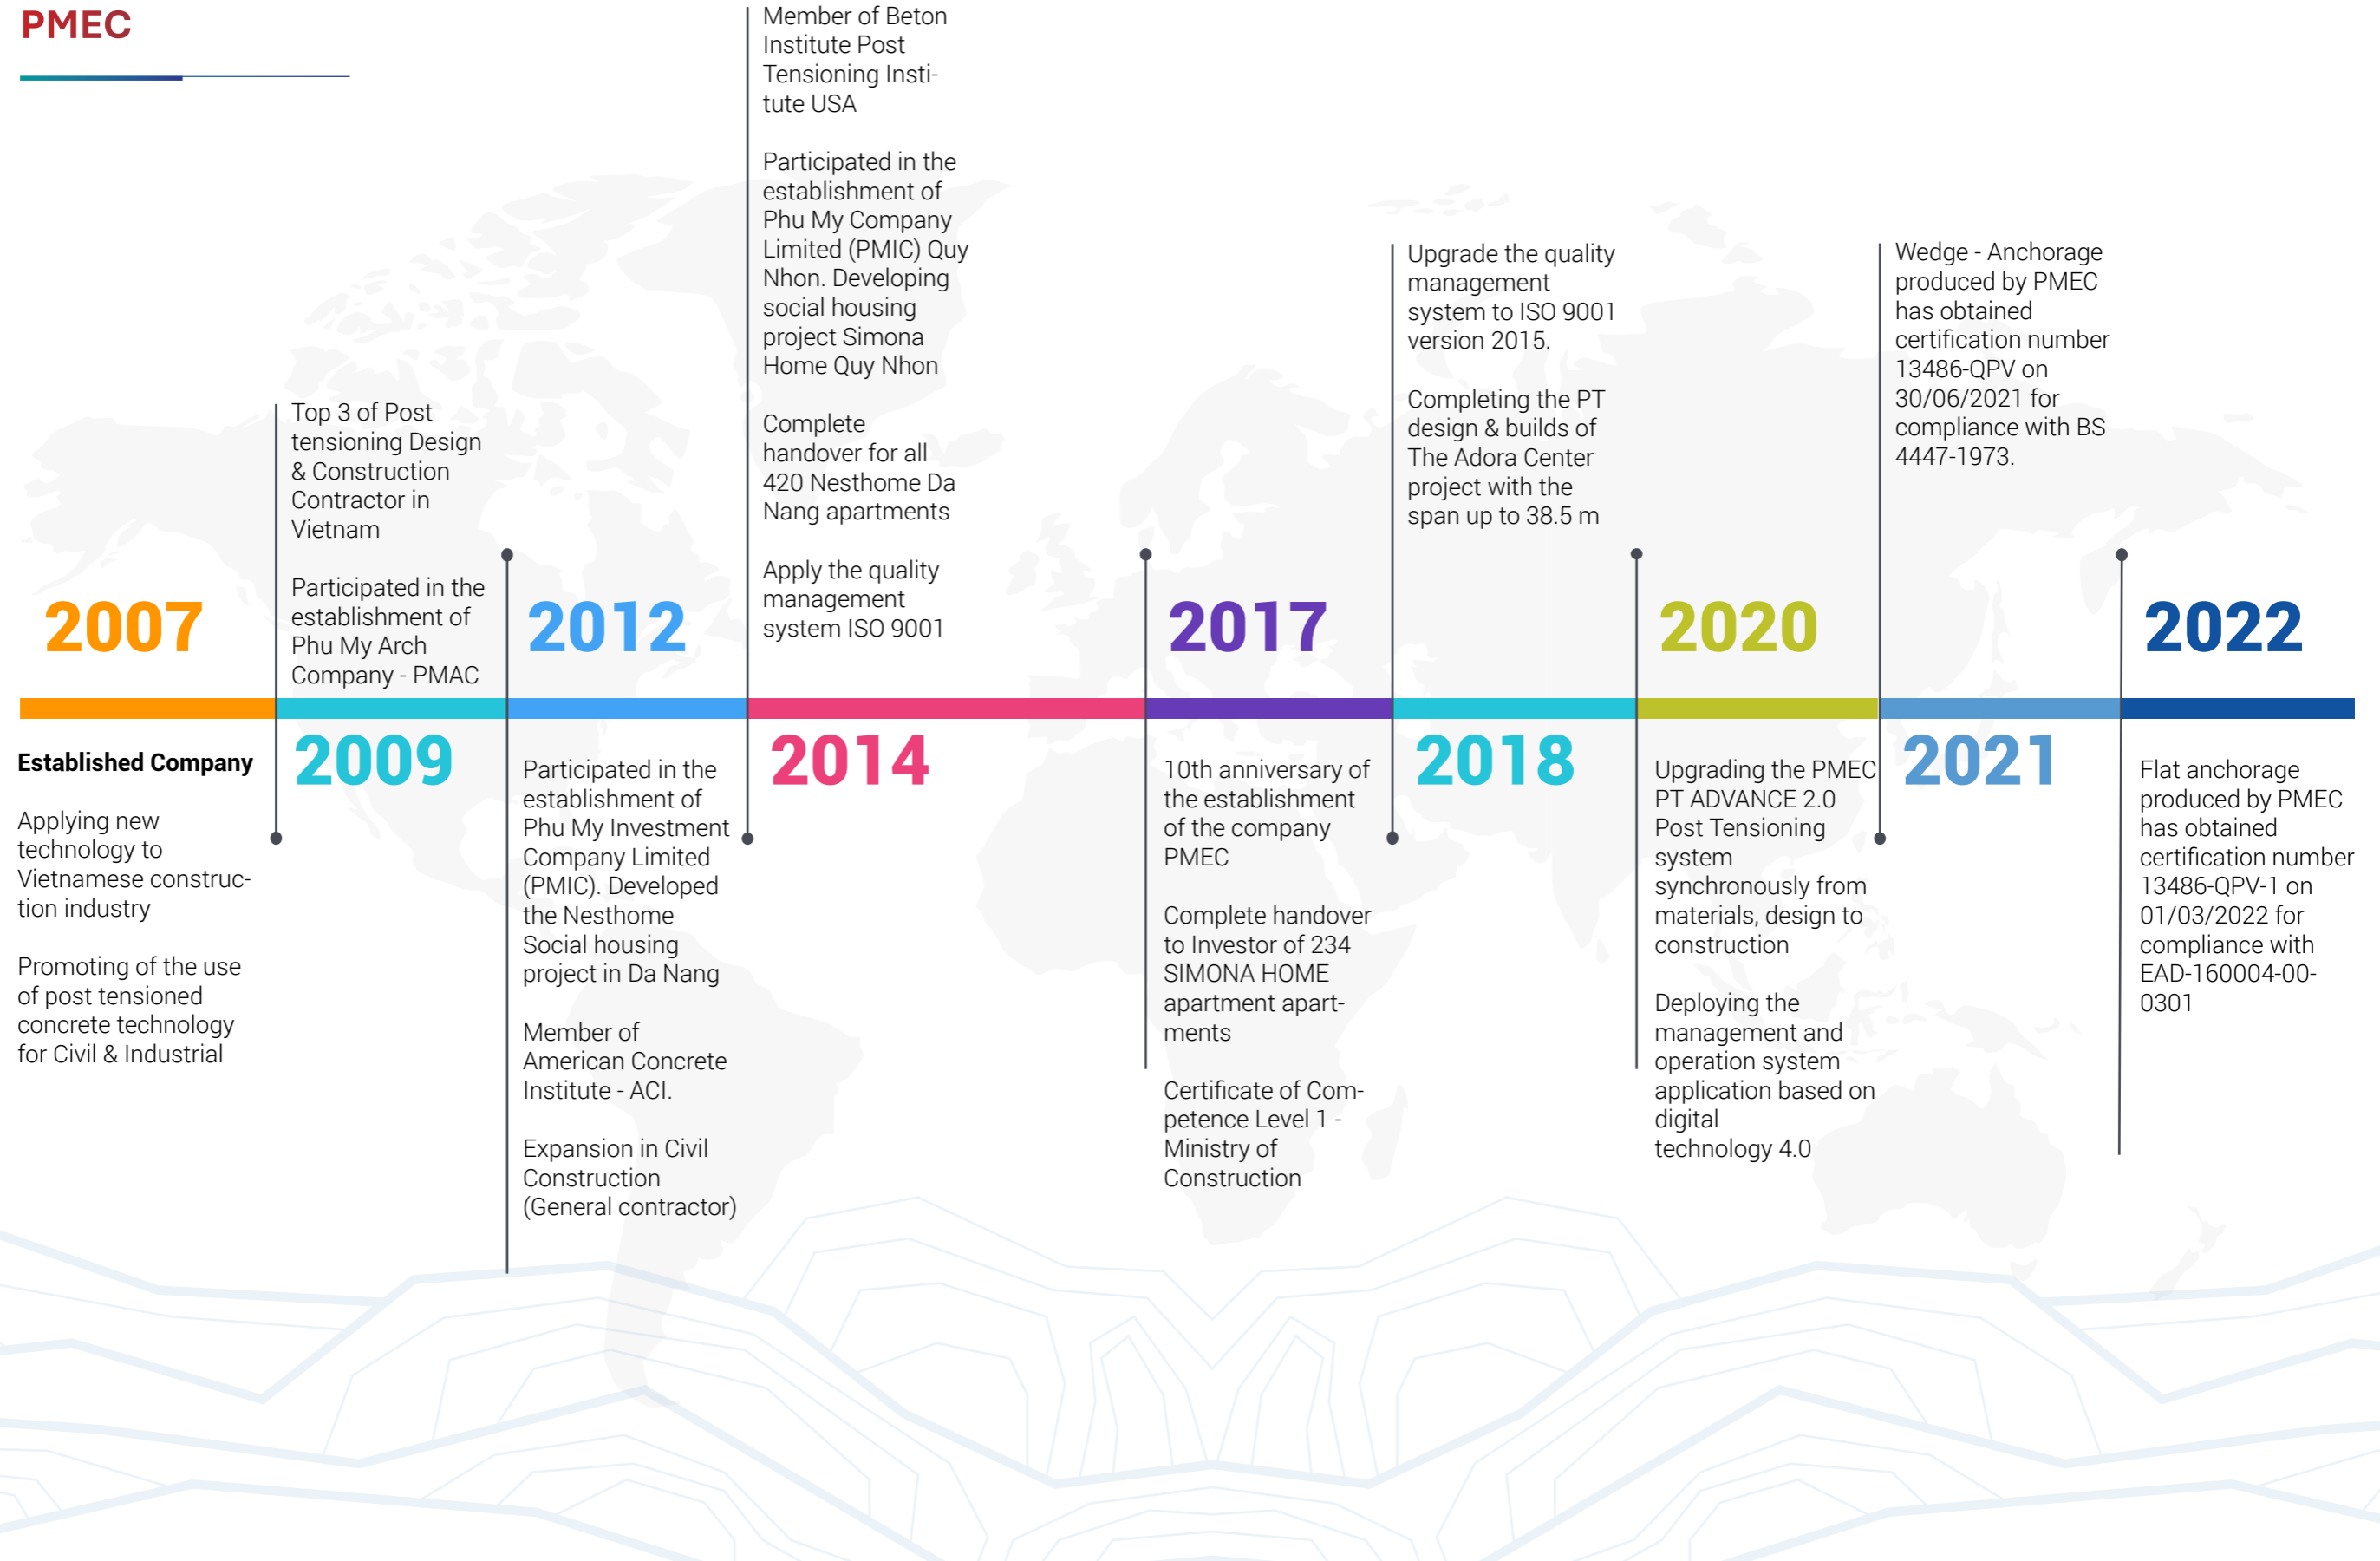

In the development path, we always give our best efforts for clients’ interest. The “focusing in client’s interests” value has been integrated into our organization culture. It will be kept and transferred to each generation of our staffs as “**Client’s interests are company sustainable value**”

We welcome our partners and clients to pay a visit to our current implementation projects to further sharing our values and discussion all potential opportunities to cooperate in future. For further information, please visit our website at:

Website: <https://www.pmec.com.vn>

# THE HISTORY AND DEVELOPMENT OF

## PMEC

## MANPOWER

PMEC's team consists of experienced personnel with key engineers who have participated in many large scale projects. All personnel are continuously trained to improve their qualifications and keep up to date with advancements in the industry. Sharing experiences, lessons from completed projects is always done so that knowledge can be inherited through generations of employees.

HA NOI OFFICE

## BACK OFFICE TEAM

At back office team, we are an enthusiasm staffs for each assigned task. Our works were implemented according to the standard operating procedure which complies with ISO 9001-2015 system to efficiently support for all projects and other company's activities

## ENGINEERING TEAM

The engineering team actively work to deliver the best engineering and design solution for each project we have involved. Especially the complicated structure elements where our expertise is useful in achieving the feasible design & construction solution

## CONSTRUCTION TEAM

We are the frontline team who directly bring quality for our project and represent the whole company in front of clients. Health, Environment & Safety, quality and schedule are always our top priority for each project we have implemented

## KEY STAFF

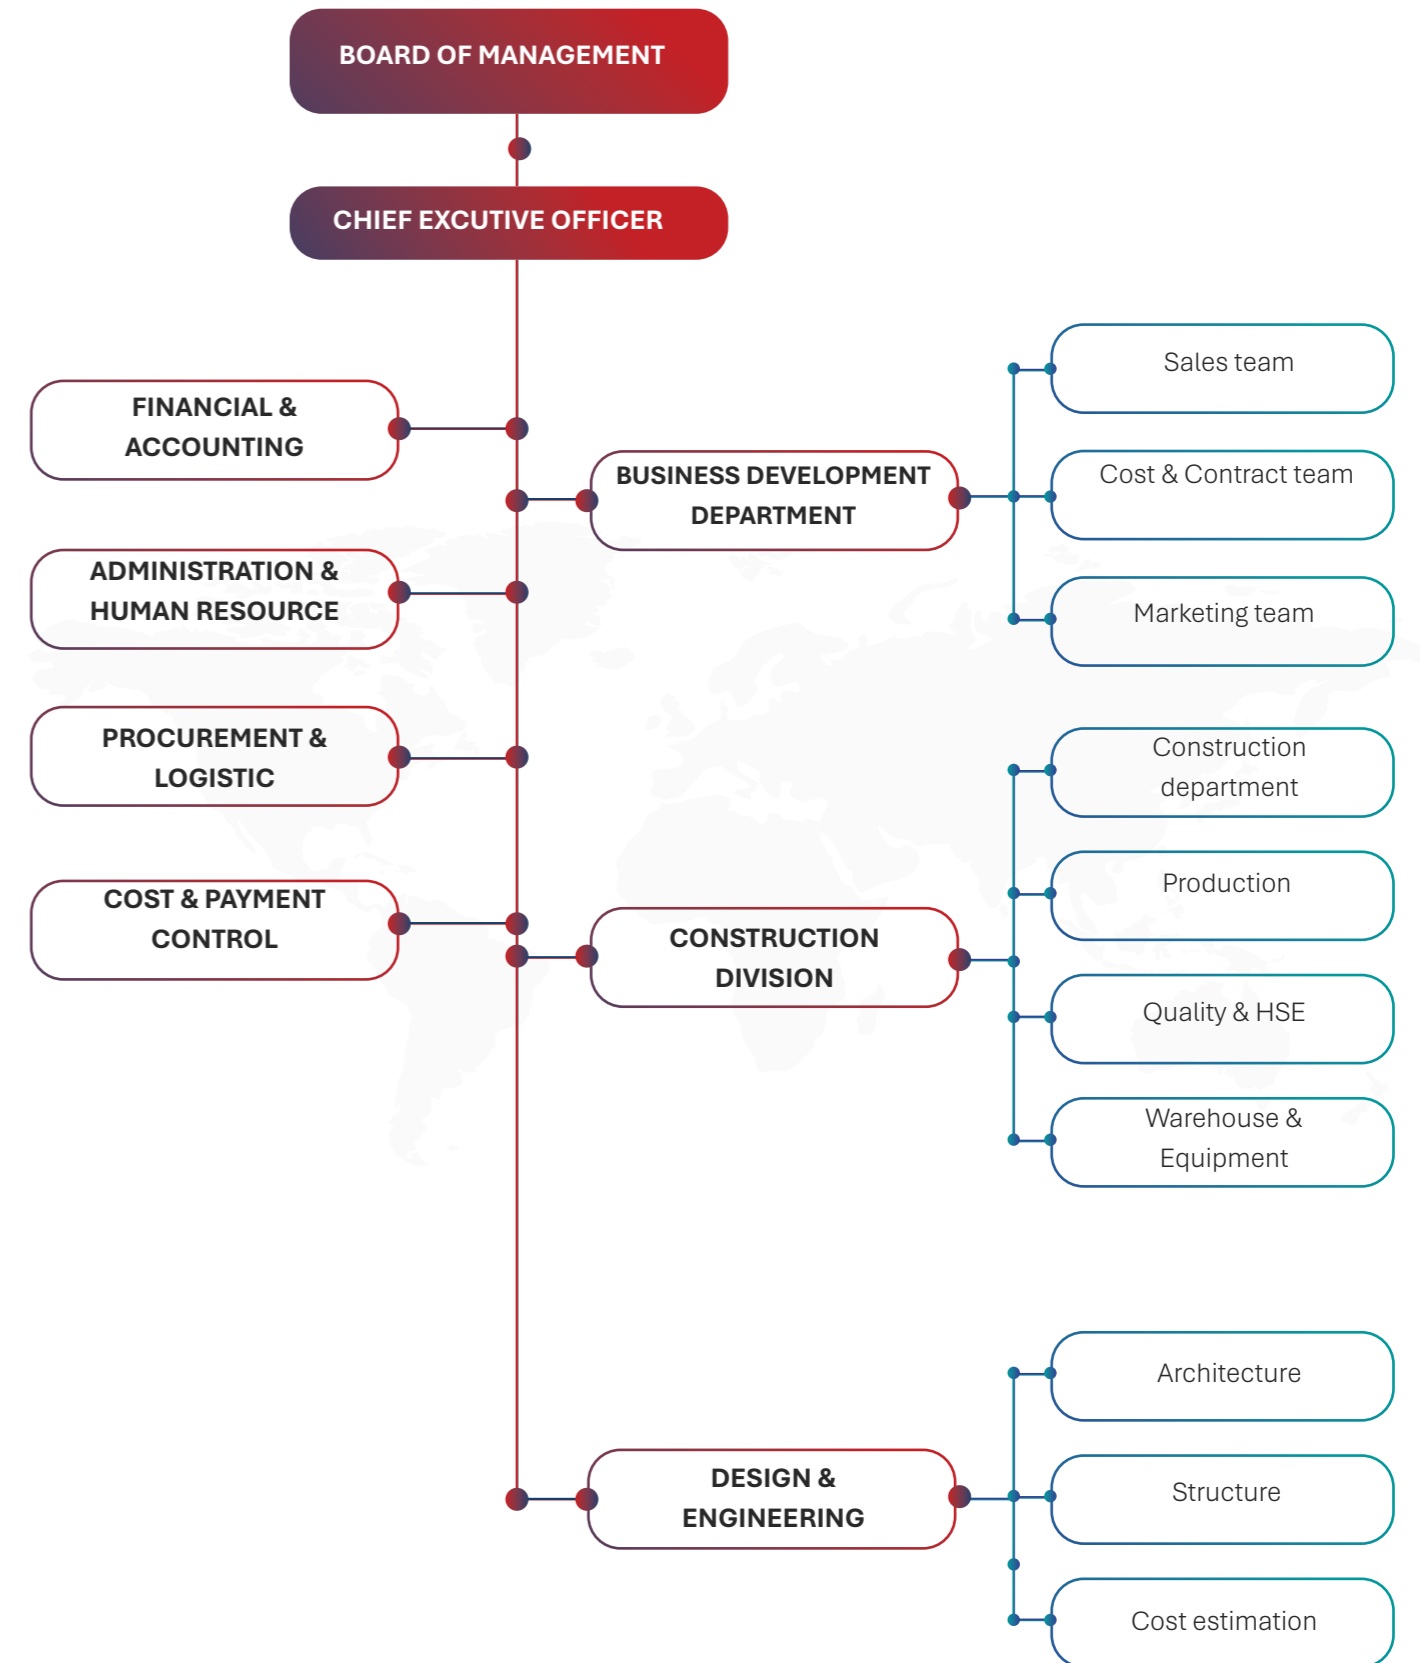

Joined PMEC in the very early day of company establishment, Mr. Phan Dang Thiem is in charge of construction management. So far, he has accumulated nearly 20 years of experiences in post tensioning installation. More than 300 projects have been successfully completed, he and his colleagues always deliver their best efforts focusing on “Reliable – Quality – Safety – Efficiency” in each project.

**Mr. Phan Dang Thiem – Post Tensioning Director**

## ORGANIZATION CHART

# SCOPE OF BUSINESS

PMEC is specializing in providing optimization solutions in structural engineering for clients' property investment projects. PMEC accumulative expertise and experiences would help in saving investment costs throughout the project life cycle.

POST TENSIONING DESIGN & INSTALLATION

DESIGN & ENGINEERING

PRODUCTION & TRADING

# POST TENSIONING DESIGN & INSTALLATION

As the first Vietnam professional post tensioning company since 2007, P MEC continues to maintain its position by providing clients a reliable and professional design & installation services. Experiences from more than 300 successfully completed projects are advantages in bringing cost optimized, efficiency and quality solution.

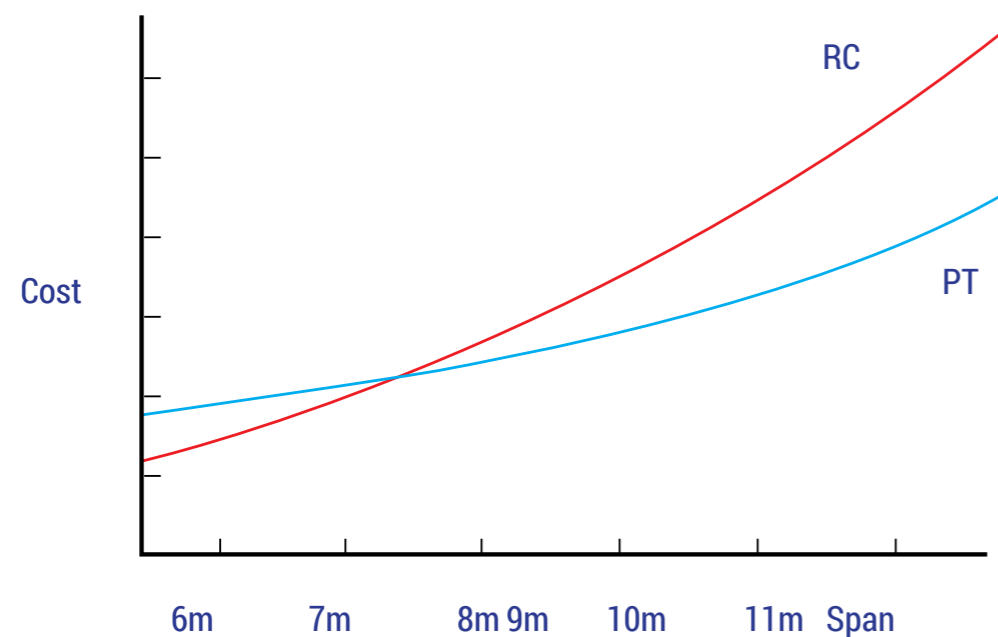

## 01 | ADVANTAGES OF POST TENSIONING

### STRUCTURE ADVANTAGES

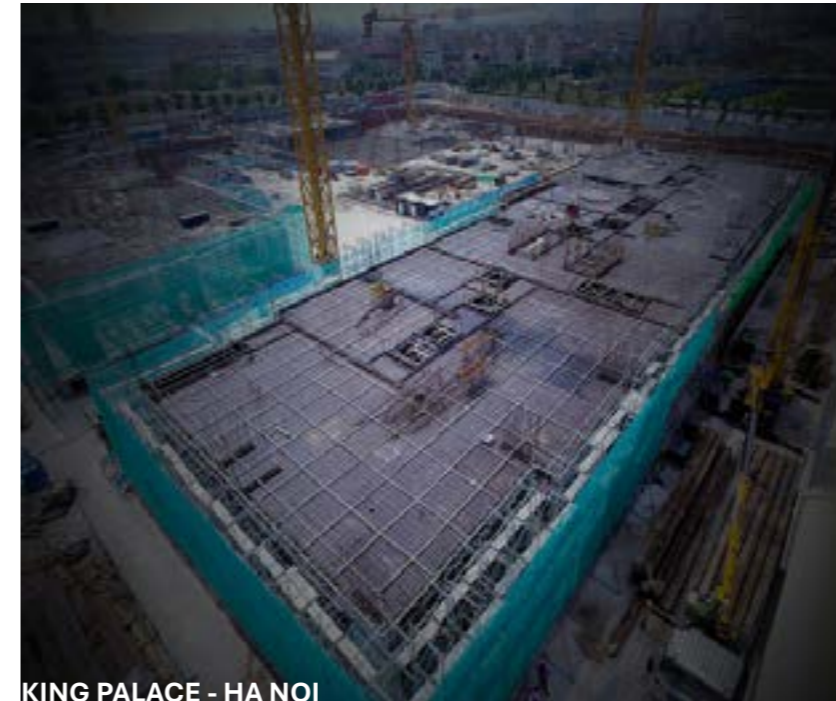

- Reducing tensile stress
- Deflection and crack control
- Thinner structure
- Less self-weight
- Less ordinary steel

### ECONOMICAL & FUNCTIONAL ADVANTAGES

- Reduce structure direct cost
- Indirect saving in finishing cost
- Faster construction sequence
- Large span
- Increase clearance height

## 02 | POST TENSIONING APPLICATION

KING PALACE - HA NOI

### BUILDING & INDUSTRIAL PROJECTS

Wide range of building & industrial projects where post tensioning could be efficiently applied including residential, commercial, office buildings, conventional center, warehouses, silo, etc...

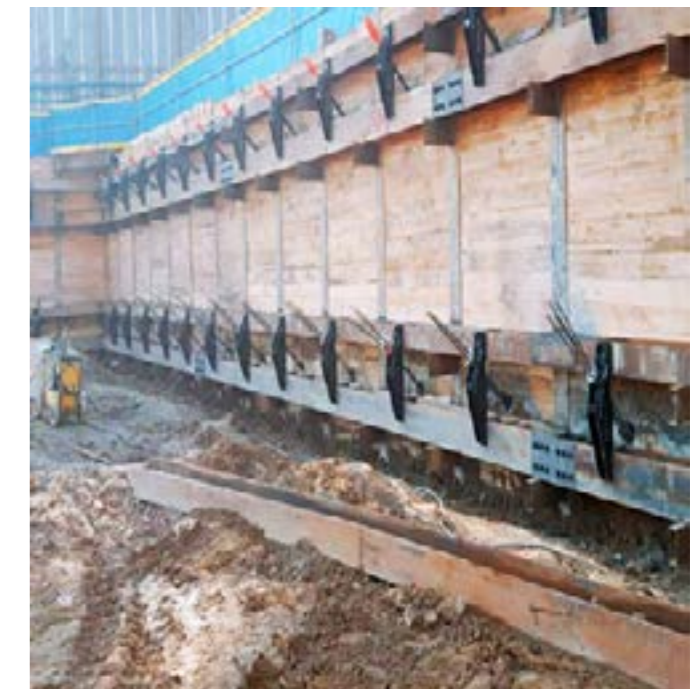

### BRIDGE PROJECTS

Post tensioning application is a mandatory for large span crossing

### INFRASTRUCTURE & GEOTECHNICAL

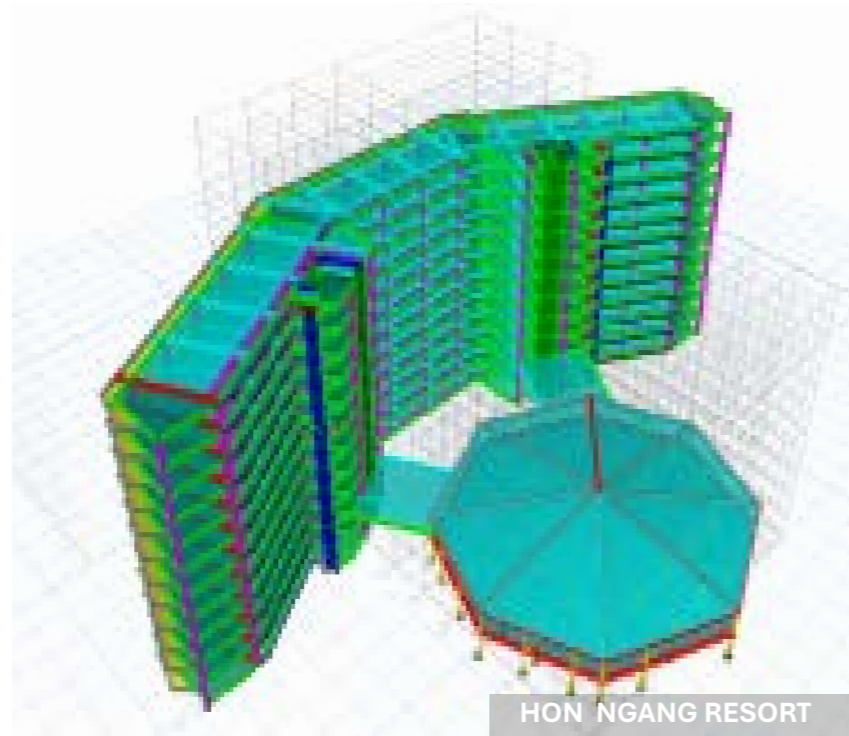

Ground anchor and large mat foundation or pile caps

# DESIGN & ENGINEERING SERVICES

Design & Engineering services provided by PMEC are always meet clients' requirement in terms of budget, schedule and quality. In any design/ engineering projects we always discuss thoroughly with our clients to formulate the most suitable specification for the project and set the budget in early stage. Our design focuses on the specification, budget, schedule and quality to satisfy clients' high requirements.

PMEC has implemented and completed many large-scale projects in Vietnam as structural engineering consultants or architect (via PMAC). We are able to provide our esteemed clients full scope design/engineering services, peer review for industrial and building projects. Our design professional licenses could be verified in the Ministry of Construction Website.

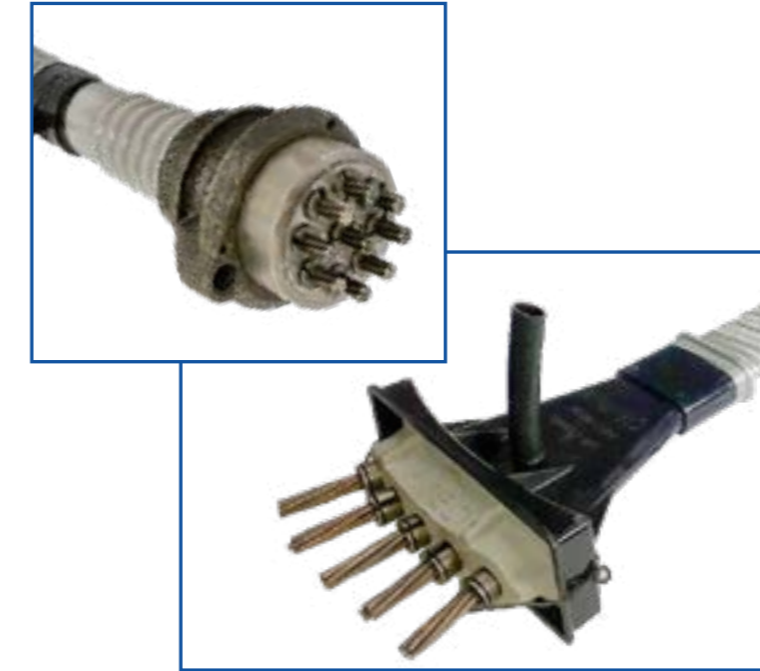

## PMEC PROVIDE THE FOLLOWING SERVICES:

- Construction Consultancy
- Design/ Engineering Services including architectural, structural, mechanical, electrical, plumbing and cost estimation for industrial & building projects
- Renovation & Reinforcement Design
- Design review

# PRODUCTION & TRADING SERVICES

To develop and specialize the PMEC post tensioning system, we have design and produced the following products and accessories in post tensioning installation.

- Post tensioning Live End anchorage
- Galvanizing steel duct
- Tendon support chair
- Strand pusher, grout mixing and pumping machines
- Other mechanical accessories

PMEC anchorage system have registered the industrial model with Ministry of Technology & Science and obtained the registration certificate from the Department of Intellectual Property. The anchorage does comply with the BS 4447-1973, Specification for the Performance of Pre-stressing of Post Tensioned Construction.

Product of PMEC Post Tensioning System is controlled according to ISO 9001-2015 system to assure the quality and achieve clients' requirements in terms of **"SAFETY – QUALITY – SCHEDULE – EFFICIENCE"**

# TECHNICAL CAPABILITY

## 02 EQUIPMENT

Equipment is a key factor for the project success. We always invest in new equipment as well as maintain the current ones to assure that the equipment is in the best.

### HYDRAULIC JACK & PUMP:

Using to stress the tendon. The jack shall be calibrated periodically to maintain the correctness of force measurement in stressing.

Mono Hydraulic Jack IHS

Multi Hydraulic Jack

### DEAD END ONION JACK

To form the onion shape dead end to provide the friction force between strands and concrete in the dead end of tendon.

### MIXER & GROUTING PUMP

Use in the grouting works after stressing finished. The mixer to mix the grout with the pre-determined volume the will be pumped into the duct with stable pressure.

### AIR COMPRESSOR

Use to clean the inside of the duct before grouting work

### STAPLER GUN

To fix the tendon support (bar chair) into the form. This is to avoid the moving of the tendon during concreting to keep its profile as designed.

### STRAND PUSHER & CUTTER

Cut the strand according to the pre-determined length then push it into the duct.

# TECHNICAL CAPABILITY

## 03 QUALITY & SAFETY, HEALTH & ENVIRONMENT

PMEC always follow all government and client requirements regarding **SHE** issues in projects we have involved including international standards from international main contractors. Our **SHE** policy secure the safety for our workers targeting to complying with OHSAS 18001.

PMEC quality system complies with ISO 9001-2015 and annually audited by a certified organization. Our works from material purchasing, design, construction and other supporting activities are strictly implemented according to ISO 9001 guidelines to make sure that we could deliver our jobs according to clients' requirement and specification.

Our manpower is continuously trained to sharing accumulative experiences and knowledges to upgrade the competencies during working process.
